ABOUT US

ASTRID PACKAGING

PREMIUM BOTTLE STOPPER

Founded in 2006 and based in China, ASTRID PACKAGING is a specialized manufacturer dedicated to the design, engineering and production of customized ultra premium bottle stoppers for the world's liquor and beverage brands, wineries and diffuser brands.

With 15 years' experience in liquor packaging industry and the advantage of being in the world manufacturing center, we aim to provide businesses with optimal, personalized and cost-effective packaging solutions.

In recent decades, a growing number of distilleries, wineries and liquor companies begin to value bottle stoppers as a means of adding greater prestige and personalization to their packaging.

In response to the growing demand for personalized packaging solutions, ASTRID PACKAGING offers a variety of stopper solutions with expertise in premium bottle stoppers that are both functional and artistic: crystal glass, wood, metal, zamak, ceramic, plastic, aluminum, acrylic, etc.

WOOD ZAMAK INNOVATION

A Classic That Never Goes Out Of Style

CRYSTAL GLASS BOTTLE STOPPER

Pure, Magic And Luxury By Nature

ZAMAK BOTTLE STOPPER

A Masterpiece Of Power And
Elaboration

HEAVY PLASTIC BOTTLE STOPPER

Elaboration And Differentiation At
A Competitive Price.

A close-up photograph of a craftsman with a beard, wearing a light-colored shirt, inspecting a clear, faceted crystal bottle stopper. He is holding a magnifying glass over the stopper. The scene is set on a workbench with various tools and materials, including a stack of wooden stoppers and a piece of paper with technical drawings. The lighting is warm and focused on the hands and the crystal.

How to choose cork stopper according to bottleneck dimensions?
 $\Phi 1 - \Phi 3 = \text{about } 1.0\text{mm}$
 $\Phi 2 \approx \Phi 4$

PREFERRED BOTTLENECK TYPE

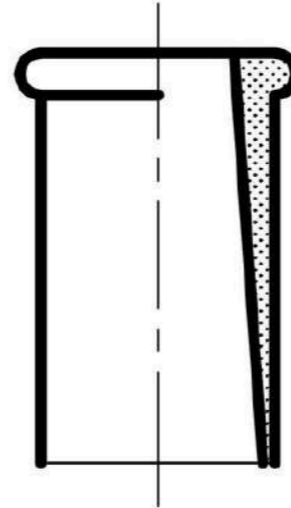

Normal bottleneck with straight entry bore. Preferred.

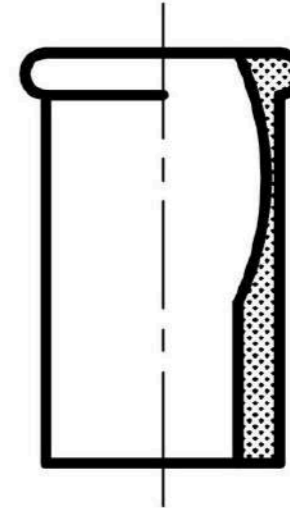

Inner bottleneck with a close-in curve on the opening provide the best sealing performance. Best Choice.

Horn type bottleneck, the sealing area is small. Cork stopper will expand in the bottom position and not easy to pull out. Also qualified.

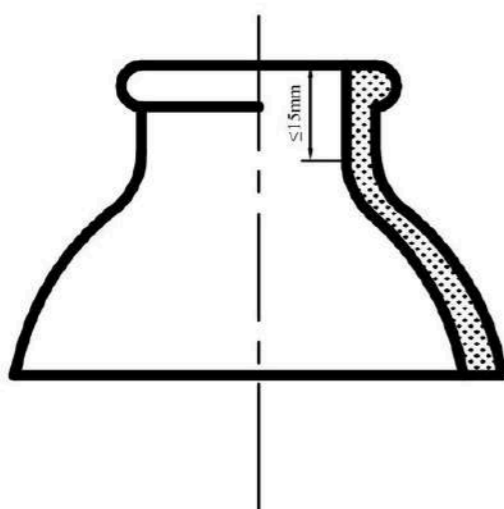

Drum type bottleneck, bulged part cannot be sealed and easy to leak. Also qualified.

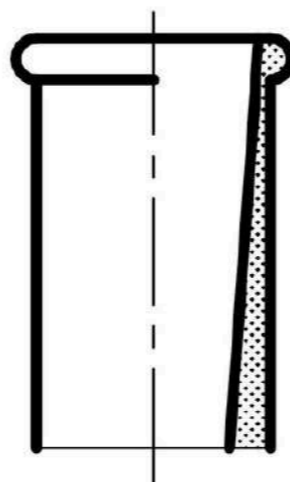

BOTTLENECK TYPE NOT RECOMMENDED

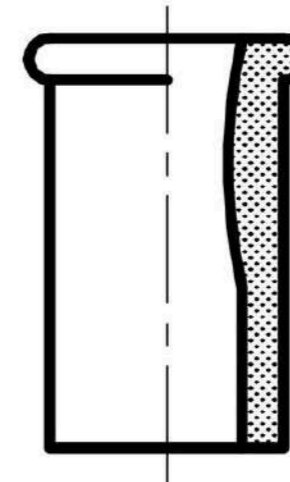

Too short bottleneck, cork stopper will expand in the bottom position and not easy to pull out. It can only be sealed with a short shank. Select with great caution.

Funneled bottleneck is easy to pop out bottle stopper and present leakage issues. The worst bottleneck. No choosing.

Wasp-waisted type bottleneck, cork stopper will expand in the bottom position and not easy to pull out. No choosing.
